KILLIAN RAMUS

Assistant Development & Project Engineer | DevOps Engineering Student

Montpellier, France | +33 6 98 00 63 29 | killian.ramus@gmail.com | killianrms.com | linkedin.com/in/killianrms | github.com/killianrms

PROFESSIONAL SUMMARY

Assistant development and project engineer in a work-study program at ITESOFT, and engineering student specializing in DevOps at Polytech Montpellier. In the Delivery team I develop client customizations (Java, AngularJS) and build automation tools: automated platform setup, CI/CD pipelines and internal tooling. Background in software development (BUT Computer Science) and in management and project management (IAE Montpellier).

EXPERIENCE

Work-Study Assistant Development & Project Engineer, Delivery team Sep 2025 - Present
ITESOFT, Aimargues (France)

- Created AutoInit, an n8n workflow that sets up client platforms end to end (Git repository, Azure DevOps pipeline, SSH/SFTP deployment, web front end, access handover): about 2 hours of manual work across five tools replaced by a one-minute form.
- AutoInit adopted by the team the day after release, around 20 platforms set up with it, now maintained by the company.
- Developed client customizations in production (JavaScript and Java business rules, RSQL, SQL, cron) for Streamline for Invoices, used by large enterprises.
- Diagnosed production incidents across Docker containers, Grafana logs and PostgreSQL; Git flow with reviewed merge requests in an ISO 27001 environment.

Full-Stack Developer Intern Jan 2025 - Apr 2025
TamaBox, Draguignan (France)

- Designed, built and hosted a statistics web application on my own (PHP, MySQL, JavaScript, Chart.js).
- Added marketing personas and a forecasting module; the client's occupancy rate went from 75-82% to 100%.

Events & Communication Lead (volunteer) May 2024 - Apr 2026
BDE Informatique Montpellier

- Organized events for computer science students and managed communication on Discord and Instagram.

EDUCATION

Engineering Degree (Master's level), DevOps, work-study 2026 - 2029
Polytech Montpellier

Bachelor's-level Degree in Management and Project Management (dual degree) 2025 - 2026
IAE Montpellier

BUT Computer Science (Bachelor's), DACS track: deployment of secure networked applications 2023 - 2026
IUT Montpellier-Sète

SKILLS

DevOps & Automation: n8n, Docker, Azure DevOps, CI/CD, Linux, Git, Grafana, Azure
Programming Languages: Java, Python, TypeScript, JavaScript, SQL, C, C#, PHP, HTML/CSS
Frameworks: Angular, AngularJS, React, Next.js, Node.js, JavaFX
Databases: PostgreSQL, MySQL, Oracle, MongoDB
Methods: Agile Scrum, code review, project management

PROJECTS

- **LobbyBot**: Fortnite bot system with multi-account management, Discord bot and real-time dashboard (Node.js, Python, Docker, PostgreSQL). Community of 8,500+ members.
- **Referendum**: Secure voting application in Java/JavaFX with ElGamal encryption and zero-knowledge proof. Product Owner in a 4-person Scrum team.
- **Backup system**: Automated client-server backup with versioning, SHA-256 deduplication, AES-256-GCM encryption, SSH transfers and a Flask web interface (Python, Linux, systemd).
